

MUHAMMAD RIZWAN

Full Stack Developer • React Native Specialist

Lahore, Pakistan | +923134976702 | rizwankambooh6@gmail.com | [linkedin.com/in/muhammad-rizwan-283625226](https://www.linkedin.com/in/muhammad-rizwan-283625226)

PROFESSIONAL SUMMARY

Full Stack Developer with around 8 months of hands-on experience building cross-platform mobile apps in React Native, and hands-on foundation in backend and web development using the MERN stack. Comfortable working across the stack: React Native and React.js on the frontend, Node.js/Express REST APIs with JWT authentication and authorization on the backend, and both SQL and MongoDB for data persistence. Built and delivered a full-stack final year project (DormMate Life) end-to-end — schema design, REST API, and a complete React frontend — alongside multiple shipped React Native apps including a Play Store health & wellness app. Quick learner, comfortable in Agile teams, and looking to grow as a full stack developer.

WORK EXPERIENCE

React Native Developer Intern — Zentix Stack

April 2026 – July 2026

- Built and maintained cross-platform mobile features for Android and iOS using React Native and a reusable component architecture.
- Integrated Firebase and Supabase backends for authentication, real-time data handling, and performance optimization, working directly with REST/real-time APIs from the client side.

React Native Developer Intern — Premlinx

July 2025 – September 2025

- Developed cross-platform mobile applications for Android and iOS using React Native and JavaScript.
 - Built reusable, modular components following clean coding practices, improving overall codebase maintainability.
 - Implemented Redux for scalable state management and integrated Supabase for real-time data sync, authentication, and a performance-focused UI.
-

FULL STACK PROJECTS

DormMate Life — Final Year Project (Full Stack Web App) | React.js, Node.js, Express.js, SQL, REST API, JWT Auth

- Designed and built a hostel/accommodation discovery platform that lets users search for available hostel rooms near their university or workplace within a 15 km radius, using location-based search and a relational SQL database.
- Built a RESTful API with Node.js and Express, backed by a SQL database, and implemented JWT-based authentication and authorization to secure user and owner-only actions.
- Designed a unique roommate-transparency feature: hostel owners submit roommate profiles for existing tenants (habits/behaviour) so new tenants can review them before booking, with a rating and reporting system to flag false listings.
- Owned the project end-to-end as an individual full stack build: database schema, backend REST endpoints, and the React.js frontend.

E-Commerce Platform (MERN) | React.js, Node.js, Express.js, MongoDB, JWT, REST API, Redux Toolkit, Performance Optimization

- Built a full-stack e-commerce application with complete user authentication and role-based authorization using JSON Web Tokens (JWT).
 - Designed and implemented RESTful APIs with Express.js and MongoDB/Mongoose for product catalog, cart, and order management.
 - Built the React.js frontend to consume the REST APIs, handling protected routes and authenticated user sessions.
-

MOBILE APP PROJECTS (REACT NATIVE)

Nyano — AI-Based Health & Mind Care App | React Native, Supabase (Play Store)

- Revamped the UI/UX of an AI-powered health and wellness app, improving usability, user data for mood tracking, health records, and personalized wellness insights.
- Delivered feature integrations for food scanning, health insights, and personalized diet recommendations.

PrideThisWay — Tour Management App | *React Native, Firebase, OpenAI, Mapbox*

- Built a cross-platform app for creating and managing location-based travel itineraries, with Firebase and OpenAI-powered automated travel recommendations and photo-based AI verification of visited locations.
- Implemented Mapbox for interactive navigation and route visualization within a Material Design UI.

ORAM360 — Marketing Agency App | *React Native, Push Notifications, Native Modules*

- Built a cross-platform app for marketing campaign creation, tracking, and real-time status updates, with proof-review workflows (approval/rejection), asset downloads, and a Material Design UI.

MyHomes NG — Real Estate Platform | *React Native*

- Collaborated in a team to build a cross-platform mobile app for a real estate platform, contributing property listing and browsing screens focused on usability and clean UI.

EDUCATION

Bachelor of Science in Computer Science

University of South Asia, Lahore, Pakistan

2021 – 2025

TECHNICAL SKILLS

Technical Skills: Performance Optimization, Reusability, Push Notifications, Native Modules

Frontend: React Native, React.js, Next.js, JavaScript, TypeScript

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication & Authorization

Databases: MongoDB, SQL, Firebase, Supabase

State & Data: Redux, Redux Toolkit, Context API, Real-Time Data Sync

Tools & Platforms: Git, GitHub, VS Code, Figma, Android Studio, Xcode, Play Store & App Store Deployment
